What You Need to Know About Health Insurance:

- It can protect you from large health care bills, which can lead to debt and serious financial trouble.
- It makes it easier to afford preventive care and early interventions. You can get the care you need now, so you don’t need more expensive care later.
- You can’t be denied coverage or charged more because you have a pre-existing condition like a mental illness or substance use disorder.
- These new plans have to cover mental illness and substance use disorder treatment just like they do for medical care. They can’t manage your mental health care or substance use disorder treatment any more restrictively than they do for medical care.
- You have a right to see a health care provider that meets your needs without unreasonable delay or travel.

QUESTIONS TO ASK WHEN CHOOSING A PLAN:

- If I choose a plan with the lowest premium, will I be able to afford the deductible and other out-of-pocket costs?
- Does the plan cover my medication? What will the out-of-pocket cost be?
- What plans have my current primary care and mental health providers in their network?
- What are the out-of-network costs if I choose a plan that does not have my provider and I wish to keep seeing him/her?
- What plans have mental health providers in my area that are taking new patients?
