

# Children's Mental Health Matters!

a Maryland public education campaign

## Facts For Families Trauma

A trauma is a dangerous, frightening, and sometimes violent experience that is often sudden. Trauma is a normal reaction that occurs in response to an extreme event. It can happen to one family member or a whole family. Examples of a trauma are:

- Violence
- Fire
- Homelessness
- Natural Disaster

After experiencing a trauma, children, teenagers and families may feel traumatic stress. Feelings of traumatic stress include:

- Feeling scared or anxious
- Feeling numb

### How it affects my child

Many people who go through trauma will have trouble adjusting to life after the event. The brain of children and teenagers may be harmed and they may not develop needed skills. After trauma, some children suffer from Post Traumatic Stress Disorder (PTSD), Child Traumatic Stress (CTS) or depression.

PTSD usually happens after a major trauma that was life-threatening. CTS happens after trauma is over. It is important to get help for a child or teenager after going through a trauma so he or she can continue to grow. For more information, refer to the Anxiety Disorder Fact Sheet included in this kit.

### Signs & Symptoms

There are lots of reactions to trauma including:

- Thinking about what happened
- Aggression or irritability
- Body aches
- Having trouble at school
- Nightmares or difficulty sleeping
- Trouble concentrating
- Refusing to go to school

### What can we do about it?

It's important to get help if children or teenagers are having signs or symptoms after a trauma. Caregivers and relatives can help children in two important ways:

1. Talking to children about what happened
2. Getting professional help

### Recommendations for families

- Learn what trauma is
- Get help from trauma experts
- Be involved in your child's health

### What can caregivers say and do?

- Tell children they are safe
- Let children talk about feelings and fears
- Go back to a daily schedule
- Spend extra time with family and friends

The Children's Mental Health Matters! Campaign is a collaboration of the Mental Health Association of Maryland (MHAMD) and the Maryland Coalition of Families (MCF) with support from the Maryland Mental Hygiene Administration and MD CARES. The Campaign goal, with over 80 partners across the state, is to raise public awareness of the importance of children's mental health.
